

## Attack Graphics Rim Sticker Installation

*\* Thank you for purchasing Attack Graphics Rim stickers. Attack Graphics Rim Stickers are made from durable, 14 mil vinyl. Unlike other brands of rim stickers, these are pre-curved, making them simple to install.*

1. Clean the rim – It is critical the rim is completely clean from dirt and oil. Use contact cleaner and a clean rag to remove any residue.

2. Remove one rim sticker strip from the paper backing. Line up one end to the side of the rim and press a small area on.

3. In one to two inch increments, align the decal and press it on to the rim. If the decal is pulled on, it will stretch very easily. **Do not stretch the decal.**

4. Once the decal is completely in place, run your finger over it to make sure it is adhered to the rim fully.
5. Repeat steps 2-4 until all four decals are applied to each side of the rim.
